Dial +1 (312) 878-3078
Access Code: 159-785-989
Audio PIN: Shown after joining the meeting
Meeting ID: 159-785-989

Making the decision to abandon the green screen development environment takes a lot of patience. Once you make the leap though you'll be very glad you did. This session examines our old comfort-zone friend STRDBG and shows the similarities, differences and productivity improvements in this new world of application debugging.

Learning Objectives:

1. Grow confidence in using the Rational Developer for i debugger
2. How to run, debug and control programs using the debugging environment and perspective.

Audience:

Programmers who have little or no knowledge using the new RDi debugger.

About the Presenter

With an IT career spanning over 30 years, Charles Guarino has been a consultant for most of them. Since 1995 he has been founder and President of Central Park Data Systems, Inc., a New York area based IBM midrange consulting and corporate training company. In addition to being a professional speaker, he is a frequent contributor of technical and strategic articles and webcasts for the IT community. He is a proud member of COMMON's Speaker Excellence Hall of Fame and also Long Island Software and Technology Network's Twenty Top Techies of 2009. Charles currently serves as a member of COMMON's Strategic Education Team (SET) and is also Immediate Past President and monthly Q&A host of LISUG, a Long Island IBM i User's Group www.lisug.org.

Charles can be reached at cguarino@centralparkdata.com.

From the President:

Happy New Year!

As a new year begins we are excited for what 2015 has in store and are grateful for such a wonderful 2014!

SEMIUG made great use of the iDevcloud box engaging group members and students alike to use the box for learning, MITEC was a great success in 2014 with the addition of pre-conference labs, workshops and student participation, our first student game competition was a great success with 14 students participating.

In January we are pleased to have Charles Guarino presenting RDi debugger presentation. Whether you are new to RDi or have been using the tool for awhile you're sure to benefit from the presentation. RDi is a must in the modern IBM i environment. Improve your productivity and enjoy the feature rich capabilities of RDi. The meeting will be hosted at BrassCraft in Novi. We're thankful for BrassCraft stepping forward and provided their facility for our January meeting. The meeting will also be provided in webinar format for group members that aren't able to join in on site.

In February John Valence will be presenting HTML and CSS. Today every organization has some sort of company web site, internal/external web applications including applications and add-on applications. At the heart of it all HTML is a must. CSS makes the job much easier.

Plans for MITEC 2015 are well under way. We will again this year have pre-conference labs and workshops for those who would like to dive in on a focused topic area of learning. We're fortunate to have Steve Will doing our opening session. We're looking forward to another great event in 2015.

As a new year is upon us it's that time of year again to renew your SEMIUG membership. Dues help the group fund activities and bring world class learning opportunities to our local community. If you haven't done so already please visit the membership page and use the membership renewal form found at the bottom of the page.

We're thankful for a wonderful 2014 and look forward to an even better 2015!

Happy New Year,

Regards,

Laura
