Modern Authentication Methodologies

Date: April 20th, 2021
Time: 6:00 PM
Location: GoToMeeting Only
Speaker: Robert Andrews

Overview:

The days of using a simple password to access your most prized business systems are over. Today, modern authentication methodologies are required to increase security. These include technologies such as Single Sign-On using Kerberos and Multi Factor Authentication using a rotating six-digit pin in addition to a password. Come learn the basics of these technologies and see them live in a demo at the end of the session.

About the Presenter:

Robert Andrews is the Team Lead for the IBM i Security and Authentication Lab Services Power Systems Delivery Practice in Rochester, MN. He is a Senior Managing Security Consultant and a certified Thought Leader in IBM for security. Besides security, Robert is an expert in Db2, journaling, and DDM/DRDA. In addition to his technical work at IBM, Robert has been strongly involved in Emergency Management and Communications for over a decade at all levels from local to federal. Robert has published seven books and holds degrees in mathematics, computer science, education, and management.
